

Professional and Competent Process Optimisation, Quality Improvement, and Technology Implementation

- ➔ At eye4improve, we maintain a strong customer focus, working in a process-oriented manner **with data-driven knowledge** and evidence

eye4improve Est. 2017

We are consultants with locations in Denmark, the United Kingdom, Germany, and the United States

Our Headquarter is located in Skanderborg, Denmark

→ Our Experience – Your Success

eye4improve is a professional, passionate, and highly skilled consulting company with expertise in process optimisation, quality improvement, technology implementation, project management, and project advisory services. We are leading consultants in Lean and Six Sigma, and we use our knowledge to create value for our clients.

Using eye4improve, you as a customer will

- Reduce your costs through quality improvements and increased efficiency.
- Receive open and honest feedback regarding your challenges.
- Receive customised services and training to meet your specific needs.

We strive to be the best at creating robustness in processes, services, and products. We work proactively to solve issues and challenges in your business.

You will learn to manage ongoing improvements in your products and processes by utilising our training.

Our greatest strength is our consultants. Therefore, you will encounter a team that is passionate about delivering the best service and achieving measurable results.

We speak our minds, but always in a kind and respectful manner
– and always based on data and facts.

We communicate at eye level with everybody involved. This applies
whether it is the employee on the floor or the top management.

We have great respect for the context in which we operate.
Our goal is to help you improve, not to impose solutions. Together,
we find the solutions that work for you.

In this way, we can gain most people's respect, challenge your
thinking and limitations, and achieve the best possible solutions to
the challenges you face.

“Our Vision is
to be the leading partner in
developing robustness
in processes, services and
products”.

Managing Director

Michael Paulsen

➔ **Values, Mission** and Vision

Our Values

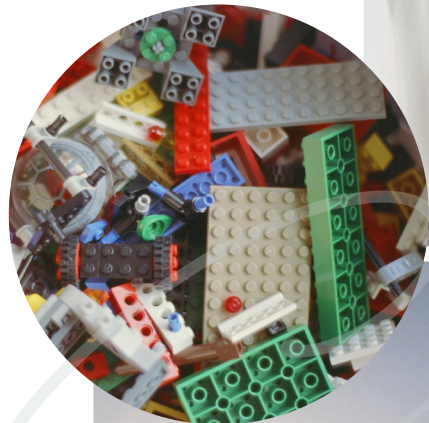

Honest, Kind, and Respectful:

- We communicate directly and honestly, and always respectfully.
- We interact with everyone at eye level.
- We respect your context and work with you to identify the appropriate solutions.
- We challenge your thinking and find the optimal solutions based on data and facts.

Our Mission

To make a significant impact on our customers and partners businesses by:

- Delivering the latest and best knowledge relating to continuous improvement.
- Developing long-lasting relationships built on trust and a high level of competency.
- Creating a workplace for people with energy, initiative, and the desire to deliver the best for our customers.
- Contributing to the development of a customer-focused process orientation and data-driven approach.

→ Foundation of eye4improve

Three basic elements form the foundation of eye4improve. These three aspects reflect an approach that is present in everything we do.

Customer-Focused

We are here to help our clients and make a noticeable and positive difference – every time!

We always meet our clients at eye level and have great respect for the context in which they operate. Our work is rooted in your values, while we honestly, kindly, and respectfully challenge your current practices and ways of thinking.

Process-Oriented

In collaboration with you, we identify the company's challenges, create a clear overview, uncover the root causes while ensuring that both management and employees are well-prepared for the task. We use an effective project structure that ensures everyone understands the purpose and their role in the process, fostering motivation and a high level of engagement from both management and employees.

Data-Driven

Our solutions and decisions are always anchored in facts.

Facts and data are presented in an easily understandable and action-oriented manner. Analyses are used to draw conclusions and make necessary decisions, providing clarity in the work and contributing to efficient progress.

→ eye4improve Consists of a
Team of **Competent Consultants**

– all with extensive experience in the areas
of supply chains, quality, manufacturing,
and development within global companies
and complex business environments.

Our client portfolio includes large companies
as well as SMEs. eye4improve offers its services
in several sectors including administration,
industrial manufacturing, food and pharma,
healthcare, retail, construction, and wind.

We have delivered more than 500 projects
establishing an efficient project structure and
a strong commitment among managers and
employees.

Green solution.
Manufacturing.
Retail.
Industrial.

"Regarding the course 'Production and Business Management' at Aarhus University for our food, biotech, and chemical engineering students, it has been an invaluable asset to draw on eye4improve's vast knowledge and extensive experience in systematising and optimising product development and production processes. Through Michael Paulsen, concepts rooted in various industries were exemplified and elaborated, making them understandable, even for students whose studies are far from the topics within Lean, Six Sigma, Kaizen, and similar. In addition to an outstanding presentation, Michael's rare insight and infectious engagement result in intensive conceptual understanding and learning for our students"

Associate Professor, Aarhus University

Henning Sejer Jacobsen

"Working with eye4improve on key projects has yielded significant improvements in our processes and methods. Their structured management style and trust-building approach have enhanced our collaborative effectiveness. Utilising the DMAIC methodology and Six Sigma principles, we have implemented substantial changes in the organisation."

Senior Director, Vestas Manufacturing

Ole Hørlück Sørensen

"I have partnered with eye4improve for an extensive period, during which they efficiently managed a variety of projects. Their remarkable expertise was especially evident in complex tasks, utilising Six Sigma competencies, and managing the implementation of production equipment in our global setup. eye4improve swiftly identifies the intricacies and challenges of each task, adapting with the necessary competencies to meet the customer's expectations. I enthusiastically give them my highest recommendation."

Senior Director at a Global Toy Company

Carsten Jørgensen

"Working with eye4improve has been a great success. eye4improve has been a committed and knowledgeable partner, adding an indispensable practical dimension to the teaching of process optimisation and project management. The students have benefitted greatly from eye4improve's involvement as a highly competent and inspiring company, demonstrating exceptional passion for both their work and their area of expertise."

Associate Professor, Business Academy Aarhus

Anne Sejer Hansen

→ Our Three **Areas of Focus**

We help businesses find the right solutions to their challenges

We work with three main areas: process optimisation, quality improvement, and implementation of technology. We help businesses find the right solutions to their challenges.

Let's get
in touch.
Call now:
+45 22 99 69 00

Process Optimisation

Need to optimise one or more processes? Whether it's specific assistance for a subprocess or an end-to-end perspective, eye4improve can help.

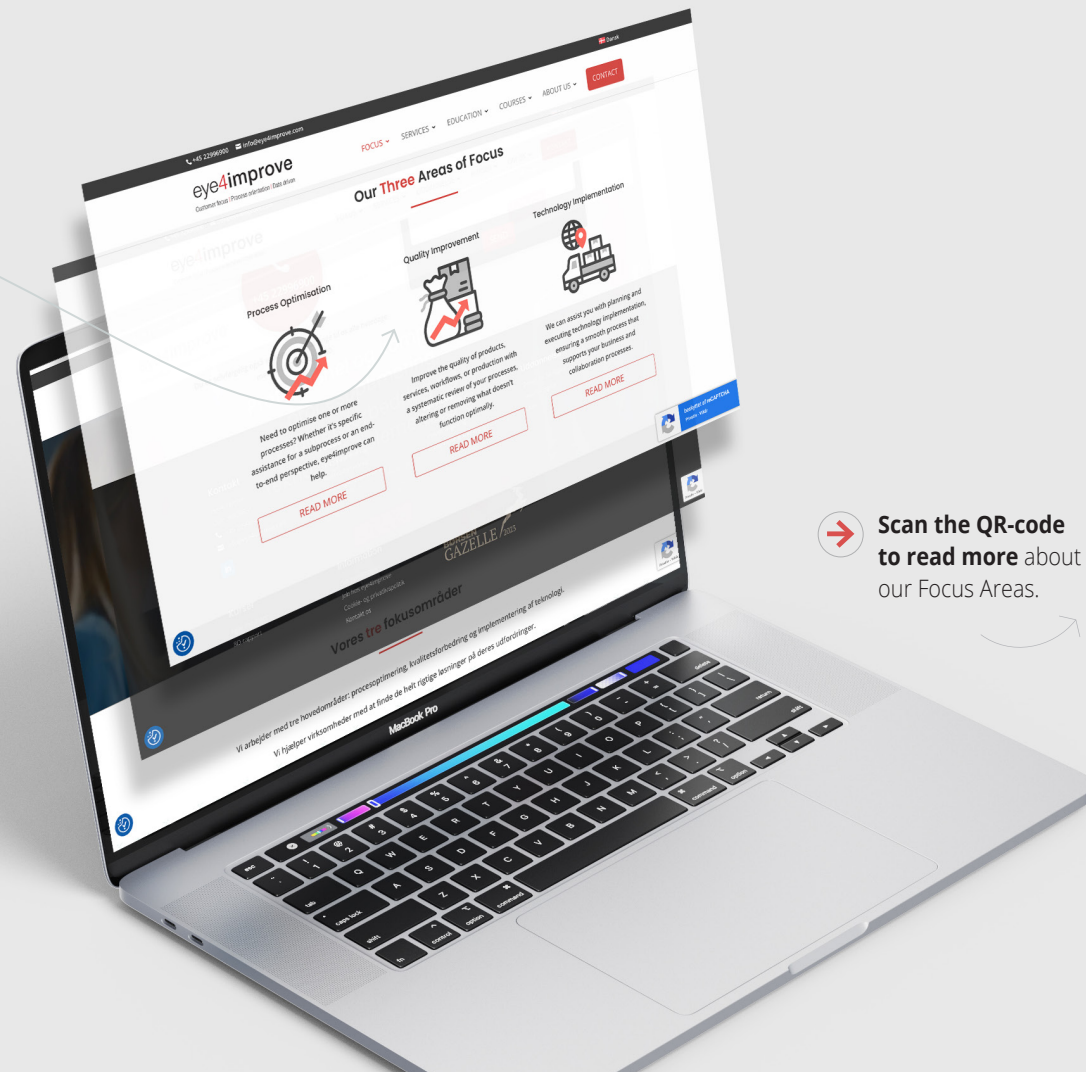

Quality Improvement

Improve the quality of products, services, workflows, or production with a systematic review of your processes, adjusting or removing what doesn't function optimally.

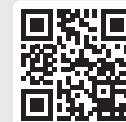

Technology Implementation

We can assist you in planning and executing technology implementation, ensuring a smooth process that supports your business and collaboration processes.

our Focus Areas.

→ Our Core Services

eye4improve specialises in project management, project consultancy, and education and training. Notably, we incorporate the Six Sigma and Lean strategies into our work.

Project Management

Our approach to project management is based on non-authoritarian management styles, strong relationships with employees, clearly defined structures, and data-driven decisions.

Project Consultancy

Do you need help solving pressing challenges? Our skilled consultants can help you gain an overview, identify underlying causes, implement solutions, and prepare you to maintain changes.

Education & Training

We have extensive experience in educating and training businesses, providing the tools, understanding, and motivation to solve challenges within quality improvement, process optimisation, and project management.

→ Our Educations

Pursue an education with eye4improve

Achieve skills that can improve your organisation's efficiency, competitiveness, and bottom line.

Design for Six Sigma (DFSS)

DFSS ensures robustness in the development of new processes, products, and services, and boosts your organisation's ability to meet your customers' desires and requirements in a timely and cost-effective manner.

Lean Six Sigma

In the Lean Six Sigma education programs, we teach you how to identify and remove the causes that create quality challenges in your existing products and processes.

Lean

Learn a method that can identify and eliminate waste and inefficiency in business processes and systems, thereby reducing costs while simultaneously increasing quality and productivity.

→ Lean and Six Sigma Education Program

A Lean and Six Sigma education program enhances your skills in process optimisation and quality management, leading to certification and career advancement. Organisations gain increased efficiency, cost savings, and improved quality, boosting customer satisfaction and competitiveness.

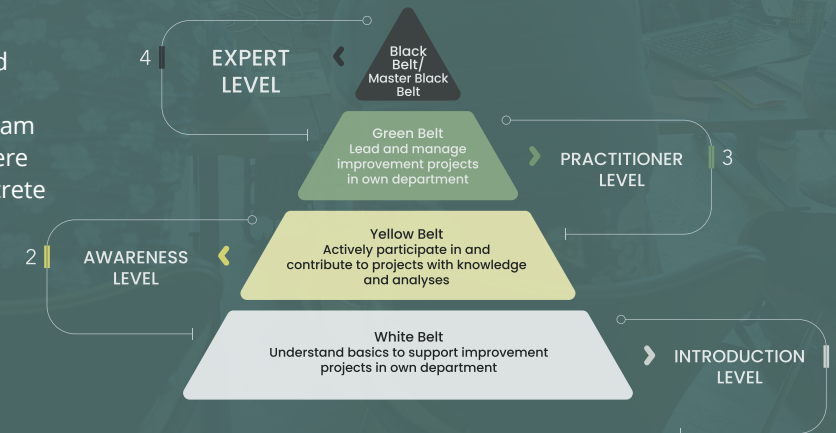

Customer-Focused

At eye4improve, we can certify at all belt levels and ensure that programs are tailored to match the specific competencies you and your company require. The education program is focused on practical problem-solving, where you will apply theoretical concepts to a concrete project within your own organisation.

eye4improve adheres to the highest Lean Six Sigma certification standards. We also offer customised courses. Please see our webpage for more information.
